

210529 AND 209608

ALTERNATORS FOR SMART VEHICLES MANUFACTURED FROM 2000 TO 2007
TECHNICAL INFORMATION

GENERAL INFORMATION

Items that are very similar physically, but are not interchangeable.

The 210529 alternator has an additional PH IN connection that receives input from the engine management unit (ECU) for activation. There is a dedicated diode in the relative cabling of the vehicle. This makes the two items different and therefore NOT interchangeable.
